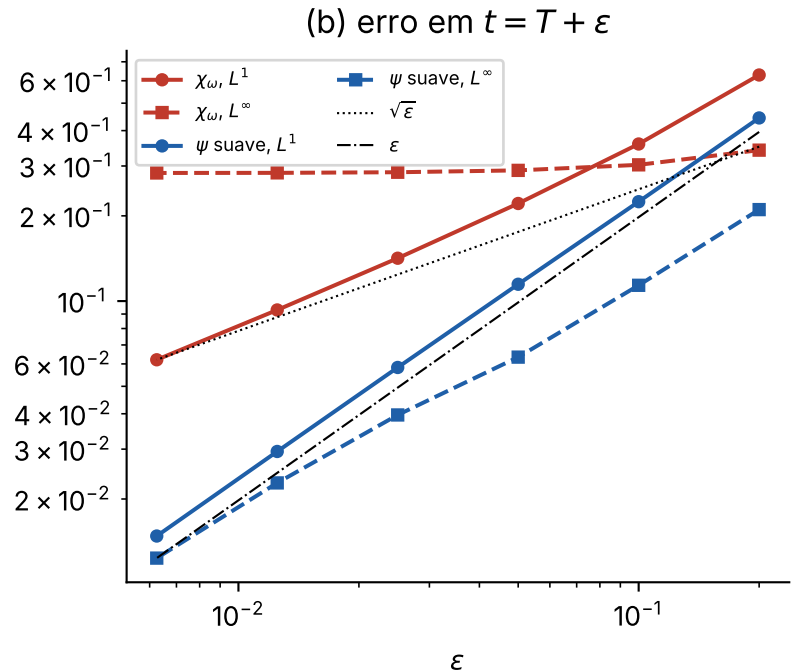
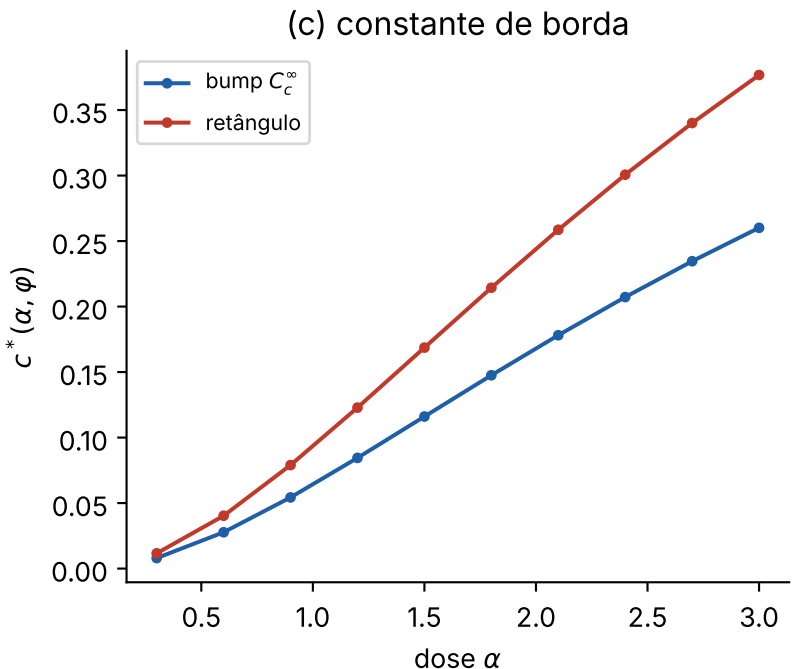
(a) mortalidade de borda $\propto \sqrt{\varepsilon}$
numérico (faixa, sem reação)
$c^*\sqrt{D\varepsilon}\int_{\partial\omega} H\,d\sigma$
massa morta a mais
ε



(b) erro em $t = T + \varepsilon$
χ_ω, L^1
χ_ω, L^∞
ψ suave, L^1
ψ suave, L^∞
$\sqrt{\varepsilon}$
ε
ε



(c) constante de borda
bump C_c^∞
retângulo
$c^*(\alpha, \varphi)$
dose α
